DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) In claim 21 it is unclear only one type of nucleic acid is being referred or both DNA and RNA . It is recommended that “and” be replaced with “or”.

SUMMARY

2. Claims 17-20 are allowable. Claim 21 is rejected under 112 second but free of the prior art. There is no prior art that teach or suggest measuring amplification by measuring increase in scattered light intensity exclusively by DNA or RNA. The prior art clearly teaches DNA concentrations using OD (see e.g. Sena et al US 5,670,316) which differs from scattered light intensity. Higuchi et al (6171785) teach measuring scattered light but with use of fluorescent labels. They do not teach or suggest exclusively from DNA or RNA.
